Roads Blocked by Two-Day Blizzard

The worst blizzard in the memory of many oldtimers struck this district Thursday evening and left in its wake snowdrifts as much as 18 feet deep in some places. The storm hit with winds of gale proportions and except for a lull Friday continued until Saturday afternoon.

Many farmers were caught in town attending a special program at Carbon Baptist Church and the weekly show. Roads drifted in so quickly that travel soon became impossible. A number of families were forced to spend the night in their cars or seek shelter at nearby farm houses.

The only serious cases of exposure reported were Mrs. Mrs. Fred Fuller and daughter, Ruth, who spent the night in their truck with Mr. Fuller between the Guy Shell hill and the cemetery. Friday morning they made their way to the Ed Ohlhauser home, arriving in an exhausted condition. Mrs. Fuller suffered severe frost bite to hands and legs and was treated by Dr. McFarlane. They were taken to Drumheller hospital Monday for further treatment.

The strong wind broke windows in the W. A. Braisher store Thursday night and the entire interior accumulated a blanket of snow. Damage to stock was negligible. The force of the wind whipped the snow through the smallest of cracks and filled outbuildings and attics. Reports have been received of considerable damage to ceilings and walls in homes, caused by melting snow which had seeped through.

Livestock weathered the icy blast in fair condition and no losses have been reported. At the Leo Halstead farm cattle sheltering in a barn packed the drifting snow underfoot until their backs were touching the roof. Some had to be removed by cutting a hole in the wall.

The first mail since Thursday of last week arrived Tuesday as rail lines were finally cleared of drifts.

Hesketh News

The Pope Lease W.I. met on Wednesday, March 14 at the home of Mrs. Jack Peterson. Sixteen members and three visitors were present. Mrs. L. Andrew won the tea prize money. An interesting report on placing of furniture in the home was given by Mrs. J. Redgwell.

Mr. and Mrs. Allen Church of Hesketh have returned from a tour of the United States.

George Bacon and Mrs. Norton and two children of Calgary have been visiting at the home of their parents, Mr. and Mrs. Jim Bacon. George has returned to the city to undergo a tonsil operation in the Holy Cross hospital.

CARBON TRADING COMPANY

Morris Switzer, prop. — Phone 18, Carbon

WESTERN BRIEFS

Air-Taxi Firm

SWIFT CURRENT, Sask.—An air-taxi firm here has been operating its three planes 1,000 miles a day since snow blocked side roads. Trips range from 10 to 160 miles.

Bright Student

WINNIPEG.—A boy patient in a Manitoba sanatorium passed three grades with honors in two years' study. Mike Andruschuk, now 16, registered in 1947 as a grade six student. In two years he completed the work for that grade as well as grades seven and eight. In 1949 he took grade nine with an average of 94 per cent, and grade ten in 1950 with an average of 92 per cent.

Honor Manitoba Doctor

WINNIPEG.—The College of Physicians and Surgeons of Manitoba announced the award of life membership to Dr. S. E. Bjornson of Minnola, Man. Dr. Bjornson, born in Iceland, came to Canada when he was 23 and was graduated from the Manitoba Medical College. He has practiced medicine at Gimli, Arborg, Ashern, Oak River and Minnola.

Cited For Valor

TURNER VALLEY, Alta. — Sgt. James Carson, R.C.A.S.C., of Turner Valley may be the first Canadian to be mentioned in "despatches in the Korean war. According to a letter received from him by his parents here, Sgt. Carson was advised he was mentioned for his bravery in taking a supply train across a stretch of land under fire.

Interest Growing

SPY HILL, Sask.—The oil boom in the Virden, Man., area, and the intense search now being conducted along the Saskatchewan-Manitoba border, are having their repercussions in the Spy Hill district. Snowmobiles and cars bearing oil company representatives have been scouring the area to get leases for mineral rights. In some cases, second options are being negotiated.

Barley As Rice Substitute

SASKATOON.—A Winnipeg exporter said that Canadian barley is being used as a substitute for rice in Japan. The official, Sam Hollman of the firm of Hallet & Carey, told the Canadian barley and oil seeds conference here that as a result an entirely new market is being developed.

Chancellor Nominated

VANCOUVER.—The University of British Columbia Alumni Association nominated Sherwood Lett, Vancouver lawyer, as next Chancellor of the University. E. W. Hamber, present chancellor, retires this year.

GREAT NEWS FOR MOTHERS JACK and JILL

Here is a grand new cough syrup made especially for KIDDIES COUGHS AND COLDS. It tastes so good they ask for more! First dose brings fast, safe relief.

JACK and JILL is made by the makers of Buckley's Mixture and is as good for their coughs and colds as Buckley's Mixture is for your own. Price 50¢.

Here's Speedy Relief For

Tender, Aching, Burning Feet

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture; you'd give anything to get relief.

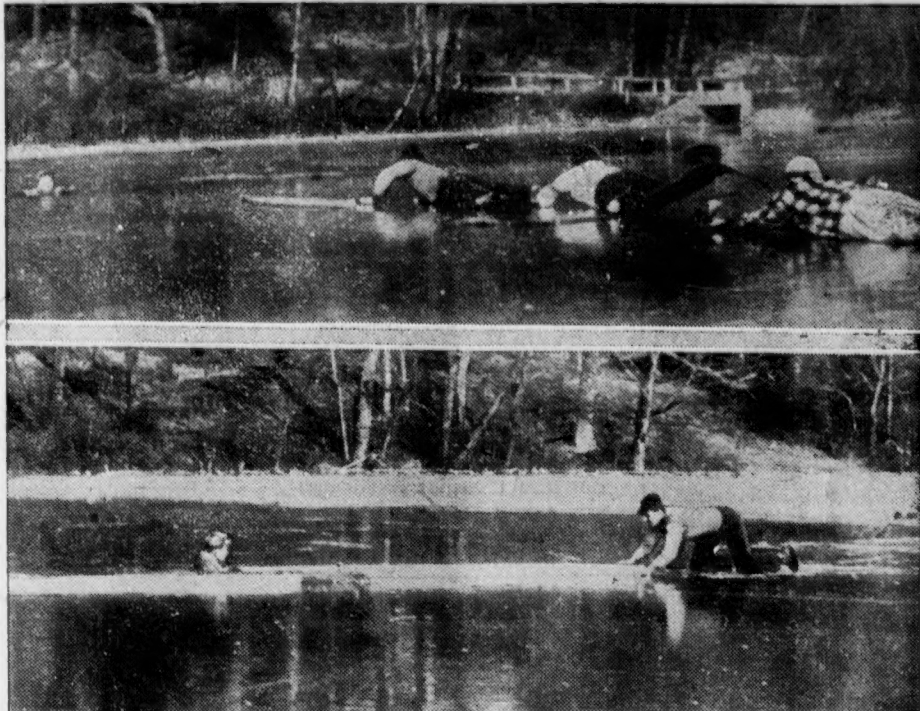

Two or three applications of Moene's Emerald Oil and in a few minutes the pain and soreness disappears. No matter how discouraged you have been, if you have not tried Emerald Oil then you have something to learn. Get a bottle today wherever drugs are sold.

DON'T NEGLECT STUBBORN COLDS!

School Children grow so fast and are so active that many become run down and listless—and may suffer from repeated colds. Give your children easy to digest, pleasant-tasting Scott's Emulsion containing Natural Vitamins A and D and other necessary elements to help build up resistance. Buy the economical large size and save.

SCOTT'S EMULSION
NOT JUST A TONIC—
IT'S POWERFUL NUTRITION

Dramatic Rescue From Icy Water

Eight-year-old Michael Kelley, of Cranston, Rhode Island, immersed in icy water, watches a human chain of four, (above), attempt to rescue him after he fell through the ice while skating recently. Benjamin Lombardo, (below), pushes a ladder within Michael's reach, completing the rescue in 20 minutes.

Funny and Otherwise

Teacher: "What is it that binds us together, sustains us, and makes us even better than nature intended?"
Tommy: "Girdles".

"You ought to get married."
"I have wished many times lately that I had a wife. She'd probably have a sewing machine, and the sewing machine would have an oil can, and I could take it and oil my office door. It squeaks."

Mother—"Aunt Hilda won't kiss you with that dirty face."
Small son—"That's what I figured."

"What makes you think your husband is delirious, Mrs. Robinson?"

"The way he says 'Cheerio?' and blows the top off his medicine."

Mistress: "You place a finger bowl at each corner of the table, Mary, I suppose they used finger bowls at your last place?"

Mary: "Oh, no, mum! They always washed before they came to the table."

The parents of a solemn little boy were perturbed at his morbid outlook on life. They were sending him off by train to relatives, and told him to write his name and address on a card and put it in his pocket. The boy did so, beginning: "In case of accident, this was Johnny Smith."

Teacher: "Are you sure you read your lessons over to yourself?"

Little Marjorie: "Yes, but perhaps I wasn't listening."

Mrs. Brown: "Has the new florist any children?"

Florist's Neighbor: "Yes a girl who is a budding genius, and a boy who is a blooming nuisance."

A widow, feeling she had been less than kind during 25 years of married life, tried to get in touch with her departed husband through a medium.

"Are you happy?" she asked. "I am that." "Now you're in Heaven, of course you'll be happier than you were with me?" The spirit voice replied: "I'd better tell you straight—I'm not in Heaven."

Farm Loans To Continue

OTTAWA.—The government plans to increase its ceiling on farm improvement loans by \$130,000,000, officials said here.

A notice on the commons order paper, disclosed that the government plans to extend the farm improvement loans act for another three years.

The act allows the banks to enter the short and intermediate-term lending field, to grant loans to farmers on livestock, implements, land and other farm security.

Previously, the government, promised to guarantee all loans up to a total of \$250,000,000. This ceiling will be increased to \$380,000,000. So far banks have extended about \$180,000,000 in loans under this legislation.

Sheep Numbers Show Increase In Saskatchewan

REGINA.—Saskatchewan's sheep numbers apparently have reached the bottom and are now on the way up, according to C. E. Beveridge, provincial livestock commissioner. High prices paid for breeding stock this winter followed a brisk demand for purebred rams last fall under the agriculture department's purebred ram purchase policy.

Under this policy, the livestock branch in 1950 accepted orders from sheep owners at a flat rate of \$40 for three star shearlings and \$30 for two star yearlings and three star ram lambs. Aim of the policy was to improve carcass and fleece quality of Saskatchewan flocks.

Eighty-one rams were placed in 1950 and "we could have sold over 100 if we could have found them," Mr. Beveridge said. In 1949, 72 rams were placed. The 1950 rams purchased cost the department an average of \$60.80 including freight and handling, compared with \$50.46 in 1949. Because of increase costs, prices charged purchasers under the policy may be higher in 1951.

Rams purchased last fall included 45 Suffolks, four Shropshires, 19 Hampshires, six Oxfords, five South-downs, and two Rambouillets.

Calendar makers passed from 1 B.C. to 1 A.D., disregarding the zero year.

about \$60 million yearly throughout the United States.

Total Value Of All Grain Crops Reaches Over Billion

OTTAWA.—Canada's 1950 wheat production was placed at 461,664,000 bushels by the bureau of statistics in a revised estimate of field crop production.

Oats production was placed at 419,930,000 bushels; barley at 171,393,000; rye at 12,333,000 and flax 4,540,000 bushels.

Total gross value of all principal crops produced in 1950 was estimated at \$1,637,000,000—six per cent. higher than \$1,550,000,000 in 1949.

Of Canada's total wheat production, 431,597,000 bushels were spring wheat and 30,067,000 winter wheat.

Largest lake in North America is Superior, with an area of 31,820 square miles.

CHEST COLDS

A "MECCA" OINTMENT AND MUSTARD POULTICE

Don't take chances on a Chest Cold—it may become very serious. A poultice made up of two tablespoons of Mecca and a teaspoon of Mustard brings excellent results. It relieves congestion and reduces inflammation—prevents blistering. In severe cases change the poultice twice daily. Mecca Ointment is sold by all druggists—35c, 50c (Tube), 70c and \$1.40.

Success Tip—Bake it with MAGIC!

DATE-ORANGE PUDDING

Combine in a greased casserole (6-cup size) 1/2 c. corn syrup, 1 tbs. grated lemon rind and 1/2 c. orange juice. Mix and sift once, then sift into a bowl, 1 1/2 c. once-sifted pastry flour (or 1 1/2 c. once-sifted hard-wheat flour), 2 1/2 tps. Magic Baking Powder, 1/2 tsp. salt and 1/4 c. fine granulated sugar. Mix in 3/4 c. corn flakes, slightly crushed, and 1/2 c. cut-up pitted dates. Combine 1 well-beaten egg, 1/2 c. milk, 1/2 tsp. vanilla and 3 tbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into prepared dish. Bake in moderately hot oven, 375°, about 40 minutes. Serve warm, with pouring cream. Yield—6 servings.

MACDONALD'S BRIER

Canada's Standard Smoke

Here's one of the greatest iron tonics you can buy to BUILD UP RED BLOOD to GET MORE STRENGTH

if you have SIMPLE ANEMIA

You girls and women who suffer so from simple anemia that you're pale, weak, "dragged out"—this may be due to lack of blood-iron. So do try Lydia E. Pinkham's TABLETS.

Pinkham's Tablets are one of the easiest and best home ways to help build up red blood to get more strength and energy—in such cases. They are a pleasant stomachic tonic, too! Pinkham's Tablets also relieve painful distress, nervous, weak,

Irritable feelings of "certain days" of the month—when due to female functional periodic disturbances. Just see if you, too, don't remarkably benefit! Any druggist.

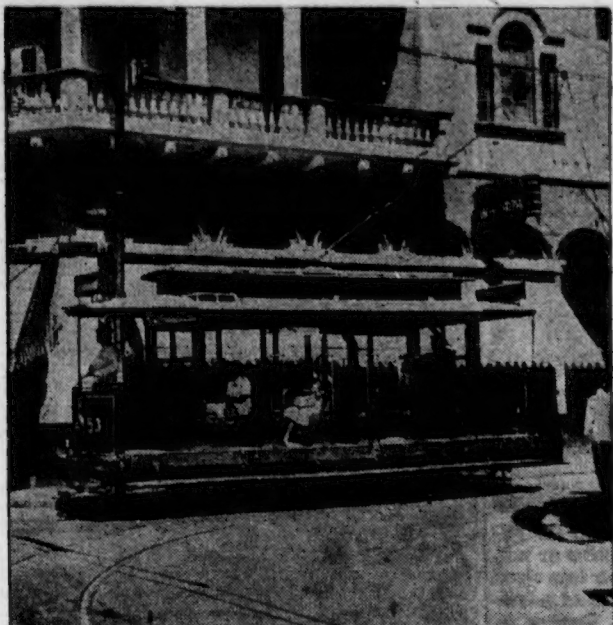

Lydia E. Pinkham's TABLETS

PEGGY

Ever-Flowing River Of Oil Makes Venezuela Debt Free

Street car in Caracas is reminiscent of old days in Canada.

By SANFORD MARKEY
(CPC Correspondent)

A never-ending river of black gold leaves Venezuela the rare distinction of being a nation that is debt free.

The river of black gold is oil; most of which is both produced and bought by American interests to help lubricate this nation's expanding preparedness program.

Venezuela's liquid wealth, discovered just 80 years ago, has hardly been touched. Yet, the Caracas government already is realizing about 30 per cent. of its income from direct taxes on petroleum, and another 30 per cent. from indirect taxes on the oil industry.

As a result of those levies, Venezuela, in 1949, completed the year \$8,400,000 in the black against expenditures of over \$584,000,000.

Indications are the Caracas black ink ledger will grow even greater, as the country's oil production, second to the U.S., moves steadily upward.

The story behind that amazing record in a land of about 4,700,000 persons is the story of know-how in oil production and the ability of the Americans and the Venezuelans to work together.

Venezuela's abundant oil deposits were first tapped in 1870 by a small local company. By 1900, American and British concerns were in the field, but not until 1914 did the vast potential of black gold begin to make its appearance.

Then, at Mene Grande, on the east side of Lake Maracaibo, in western Venezuela, an American firm tapped its first big gusher. From the time that field went into commercial production, up to the end of 1949, it has produced about 340,000,000 barrels of oil.

Three years later, the same outfit discovered the LaRosa field, also in Lake Maracaibo. In 1922, when one of the wells flowed wild at the reported rate of 10,000 barrels a day, the entire oil world made a bid for Venezuelan deposits.

Today, there are 13 oil companies operating in that South American country and 53 oil fields are under development in the northern half of the land. It is estimated that since 1917, four and one-half billion barrels of oil have been pumped out of the earth.

Despite that large output, oil experts say that there are still nine billion barrels of black gold under the 352,000 square miles of Venezuela.

Though American companies out-produce others, both British and Dutch interests also produce oil in Venezuela.

The Venezuelan government controls the industry through laws which give the nation sole ownership of the sub-soil. The law on sub-soil ownership varies in different parts of Canada.

To drill for oil, Venezuelan laws prescribe contract rights, and to obtain these contracts or concessions, the oil companies pay royalties.

The oil boom has provided jobs for more than 50,000 natives and many Venezuelans now hold top positions in the industry. At the same time, from royalties and taxes, as well as through the expansion program of the oil companies themselves, Venezuela is becoming a modern nation.

Most of the country's imports come from the United States. In 1949, the country bought 74 per cent. or \$514,000,000 of its imports from

Embroidery at oil field school.

its neighbor across the Caribbean sea.

A cordial relationship exists between the United States and Venezuela. L. G. Smith, oil company vice-president, described the oil companies' position this way:

"The oil companies have recognized from the beginning that their interests are parallel with those of the country, and what is good for Venezuela is good for the industry.

"The companies' aim at all times, therefore, is to be 'good citizens' and this attitude is manifested in a multitude of ways."

For example, oil companies have built more than 1,240 miles of roads; intensified public health; built schools (one outfit reduced illiteracy among its employees from 82 to 12 per cent. in 10 years); built homes, playgrounds, etc.

So it is, that from a river of black gold there flows the profits that may well make Venezuela the most modern country in South America.

Just before crashing into the ground meteorites attain a speed of several hundred feet a second.

Pie Fit For The President

CHICAGO. — Miss Marcheta Benton, of Chattanooga, Tenn., winner of a contest to choose the "best" cherry pie baker of 1951, prepared to take her winning pie to Washington and to President Truman.

Miss Benton, a smiling 18-year-old, said anyone could make a pie fit for a president with her recipe. "Just measure right and follow the directions", she said. "It's real easy."

Here they are:
Ingredients (crust)—1½ cups of flour; ¼ teaspoon salt; ½ cup lard; ¼ cup cold milk.

Directions — Measure sifted flour and salt into mixing bowl. Cut half the lard into flour to cornmeal consistency, using pastry blender. Cut in remaining lard and blend to size of large pea. Add cold milk, small amount at a time, using a fork. Place on pastry board and work slightly until all particles hold together. Divide into two parts, one part a little larger than the other for lower crust.

Roll dough for lower crust on pastry board to ¼ inch thick. Roll from centres. Fold into quarters and place on pie pan. Trim crust; pour in filling slowly. Dot with butter. Moisten edge of lower crust with cold water. Add upper crust and trim. Turn edge of upper crust under edge of lower crust and crimp edge with fork. Bake at 375 degrees 45 to 50 minutes.

Ingredients (filling)—3 cups sour canned cherries; 1 cup sugar; ½ cup cherry juice; 5 tablespoons flour; ¼ teaspoon salt; ¼ teaspoon almond extract, and 1 teaspoon butter. If frozen cherries are used, thaw and measure; reduce sugar to ½ cup or ¼ cup plus two tablespoons.

Directions—Drain cherries. Measure 3 cups and add juice. Measure and sift flour, salt, and sugar together, and add to cherries. Stir slightly and add extract and stir again.

TRY AND STOP ME!

By BENNETT CERE

In the heyday of his success, Balzac was indulgently autographing kiddies' albums at a watering resort when an elderly lady deposited a dog-eared notebook in his lap and said, "would you read one or two of these compositions and tell me if you think your young author has any possibilities?" Balzac glanced through the notebook and said, "Madam, I believe in being frank. The lad who wrote these pieces is obviously slovenly, unimaginative, and totally devoid of talent. Train him to be a janitor, if you will, or a collector of garbage, but don't, I beg you, encourage him to do any more writing."

"How very fascinating," chuckled the elderly lady. "If you will turn to the name on the inside of the cover of this notebook you will observe it was your very own when you were a little boy in Monsieur Herriot's school."

FORMED BY MELTING ICE, SNOW
The Tasman river in the South island of New Zealand is formed by melting ice and snow from the Tasman glacier.

WILL THE TREADMILL STOP?

—Carmack in The Christian Science Monitor.

New Hormone Successful In Growing Hair On Bald Men

NEW YORK. — A new hormone has grown hair on two men who had been bald for five years, it was reported here. Startling some time ago, the hormone was rubbed on in a cream, daily for several days and then intermittently.

Now, it is said, each man has hair about an inch long on the bald area—not fuzz but apparently normal hair—with a total of about 20,000 hairs on each head and signs that more may come. This count is about one-sixth of the normal amount for an average young man.

The report on the hormone's work was made at a press conference by Albert Roberts, president of the United Research Laboratories, Philadelphia.

An earlier report was made in Philadelphia about two months ago, telling of the discovery of the new hormone and effects on white rats (Wistar strain).

Roberts said he discovered the hormone while extracting the new hormone, ACTH, about two years ago.

ACTH is one of the sensational hormones for rheumatic arthritis and numerous other diseases. It comes from the pituitary gland, a little round organ in the brains of humans and animals.

Roberts said the hair-control hormone is closely associated with ACTH. He named it the dermatotropic hormone.

In the experiments on rats, the animals lost their hair when their pituitaries were removed. The hairless animals grew new hair in two ways: all over, when the hormone was injected into their veins, and only on the place where the hormone

cream was rubbed when it was applied externally, Roberts said.

The animal experiments indicate the hormone will grow hair only in the places where hair once grew, Roberts said.

In humans, he said, both his and other experiments indicate this hormone grows hair, when rubbed on in cream or injected into the veins, only on the head and in the hair follicles that had quit growing hair. He said the experiments have not been undertaken to find out whether the hormone will grow hair if rubbed on to other parts of the body.

The two men experimented upon had brown hair and the new hair is brown.

Roberts stated that experiments on women now are planned.

He announced the hormone will be made available to research institutions but will not be sold to the public.

Pastel tones in leaf print design are Aliandri's choice for this Claire McCardell wrap-around classic.

On The Side : By E. V. Durling

Car-Racing On Ice

The iron-clad battleship originated in Korea in 1592 A.D. It was invented by a naval ship construction genius named Admiral Sun Sin Lee. It was turtle shaped. It routed attacking Japanese fleets on three different occasions . . . How are you at driving an automobile on an icy road? What speed can you attain on the ice? In Sweden they have automobile races on ice, with cars going at fifty-mile-an-hour clip around turns. Spiked tires are used.

Now And Then

As for the record of time between blessed events, it may be held by a Chicagoan who had her first child on May 10th, 1916, and her second on Nov. 21, 1943. That's over twenty-seven years between blessed events. At the time of the birth of her second child this woman was forty-six years old.

A Record

Bill Fletcher of Los Angeles says at the age of seventeen he lifted 1,125 pounds. "What's the record?" he asks. Louis Cyr, a French-Canadian, in Quebec, Canada, on October 1, 1881, lifted 3,641 pounds.

Too Young, Grandpa

Bill Taylor of Detroit, Mich., became a grandfather for the first time at the age of thirty-four. That certainly is a very early period in life to get into the "grandpappy" class. Have been asked if there is a major league ballplayer who is a grandfather. "I don't know of any. Of course, with fellows becoming grandfathers at thirty-four it could happen.

Postman's Headache

Correspondent says she addresses her letters by putting the city first, street and number second, name third. As for example: Toronto—Madison Ave. 234—John Stevens, Esq." She adds: "My daughter says this way of addressing a letter is utterly ridiculous. To that I didn't pay much attention. 'Utterly ridiculous' is one of my daughter's favorite expressions. However, when the postman said he didn't like the system, I took notice. I thought it helped post-office employees."

Tried And Found Wanting

Sherman Billingsley, pooh-bah of Manhattan's Stork club, is a great believer in long red flannel underwear as a cold preventive. Last winter he tried wearing boxer's shorts and immediately caught cold and had to go to Florida for six weeks to recuperate.

Englishmen like their cigars very dry, but I don't know why. Smoking an excessively dry cigar is like biting into a whiskbroom. On the other hand, cigars can be too fresh. Then they don't burn right. Don't taste so good either. I am trying to smoke one like that right now. If somebody had given it to me, I would throw it away. However, for this cigar I paid cash and am going to smoke it to the bitter end.

AN IRISH BEAUTY—Honoring the good St. Patrick, starlet Barbara Bates symbolizes Ireland's beauty. Note the g-e-n-u-i-n-e shillelagh.

GARBO BECOMES U.S. CITIZEN — Greta Garbo, one of the most famous stars in the history of films and now a well-known Hollywood recluse, is seen above as she recently signed for her citizenship certificate in the Federal Court of Los Angeles after taking the final oath that made her a citizen of the United States. The taciturn Swede, heavily veiled, hurried away without comment as soon as the formalities were completed.

CHOSEN AS POSTER BOY IN EASTER SEAL CAMPAIGN—There's a seven-year-old boy in Welland, Ont., who is paralyzed from the waist down and will be for the rest of his life. But despite his handicap, which doctors say is caused by a gap in his spine the size of a five-cent piece, Dennis Gibbons, seen right with younger brother Conrad, is a very happy boy. For he has been chosen as "Timmy"—to symbolize 1951 Easter Seal campaign of the Ontario Society for Crippled Children—this year winning from Feb. 25 to March 25 with an all-time high objective of \$375,000. The plucky young son of a veteran paratrooper and former Timmins diamond driller has 100,000,000 Easter Seals for sale in an attempt to help finance 75 per cent. of the work carried out among 4,600 crippled children in Ontario.—Central Press Canadian.

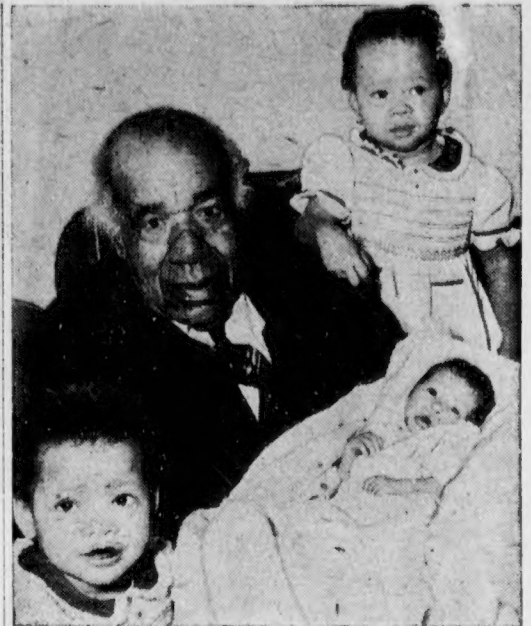

IT'S WASHDAY ON SU WON FRONT—On the Suwon front in Korea, come onrushing Red hordes or not, the very necessary occupation of keeping their togs clean keep many a U.N. soldier busy. Here, in lieu of a conventional clothes-pole and line, Staff Sgt. Eugene A. Jorday of Edwardsville, Ind., is seen making use of army vehicles lined up at the Suwon airport. Meanwhile on fighting front tank-led U.N. forces were reported to have rolled forward seven miles in central Korea's mountains, beating off weak Communist counter-attack north of the highway hub of Chechon.—Central Press Canadian.

DUKE OF EDINBURGH, now commanding the frigate Magpie in the Mediterranean, will give up this post in August. He will not take up another naval appointment until the King and Queen return from their Australian tour in the middle of 1952. It was reported the Duke will be posted to admiralty in London, making him available to help Princess Elizabeth in carrying out her state duties.

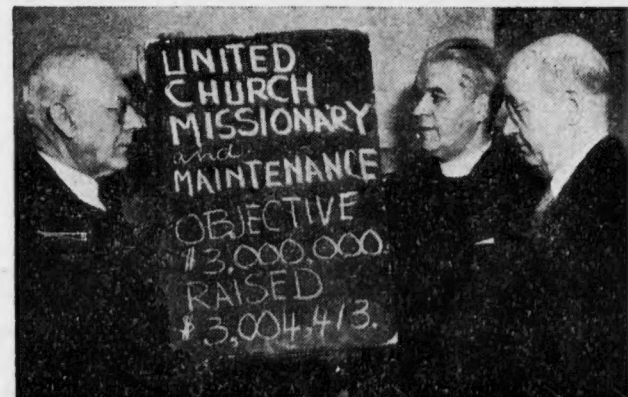

KILLED BY RED RUSE—Lieut. Col. N. P. A. Den Guden, commander of the Netherlands battalion in Korea, was killed recently by Chinese soldiers who disguised as South Koreans, walked into the Dutch command post and borrowed ammunition. Then, without warning, they turned their guns on those in the post.

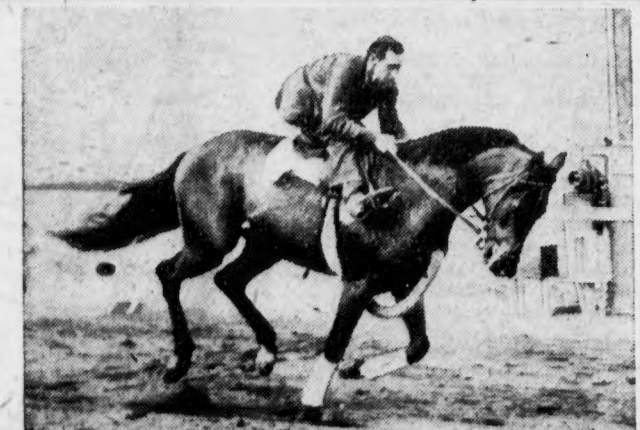

AVOIDS WORK, IS FATHER AT 101—Proud papa at the age of 101 is the claim of Rev. James E. Smith of Carbondale, Ill. A retired preacher, singer and funeral director, he explains his vitality is due to a good appetite and avoidance of hard work.

ONLY A FEW MORE DAYS UNTIL—Able Seaman William Gordon of Edmonton crosses off another day on a calendar aboard the destroyer H.M.C.S. Cayuga. With the Cayuga due to start home early in March after more than seven months' service in the Korean war zone, crew members are keeping close track of the days. H.M.C.S. Huron, new en route to the Far East, is scheduled to relieve the Cayuga.—Central Press Canadian.

CHURCH REACHES FUND OBJECTIVE—With its \$3,000,000 objective reached the Missionary and Maintenance Department of the United Church of Canada closed its books on the 1950 fund collections. The money was donated by citizens across Canada for schools, missionary establishments and other church projects in Canada's frontier areas. Rev. Dr. Denzil G. Ridout, (left), secretary of the fund, shows the final tally of \$3,004,413 to Rt. Rev. Dr. Clarence M. Nicholson, moderator, and A. E. McBride, chairman of the committee.—Central Press Canadian.

AIMS AT TURF'S \$\$\$ RECORD—Calumet Farm's Citation, the horse that's won more money than any other in the world, is shown during a workout at Santa Anita preparing for a comeback in an attempt to become the first horse to earn over a million dollars. Citation, who has won \$938,630, has recovered from a leg injury and will be ready for the races in a few months.

Carrying The Puck

When the puck-carrier meets a checker, and decides not to pass, he immediately has to come up with some fast answers to some important questions. He has to know, for instance, the defensive weak spots of the checker; whether he plays the body or the puck; whether he charges or backs up; if he is faster or slower; whether his hook check or his poke check is more effective.

The puck carrier must decide all these things in a split second, look over the situation and decide what the answer is. The ability to come up with the right answer at the right time and put it into effect makes or breaks the hockey player.

This week, I plan to outline some of the "answers"—the tactics which should be used against various types of checkers. In the next column, I will analyze some of the tricks and skills N.H.L. stars like Syl Apps, Maurice Richard, Cal Gardner and others use to get that puck down the ice.

In any case, here are a few general rules:

1. When faced with a slower opponent, use skating tricks. These include a change of pace, change of direction, shifts, and so on. Use your edge in speed to outskate him. If you are exceptionally fast, keep in the open as much as possible.

Faster opponents, of course, are tougher to beat. Make a fast man come to you, then try stickhandling tricks or body deception. If the checker is exceptionally aggressive, invite action and then try to turn his aggressiveness against him with shifts and agility tricks.

2. Open things up when the checker plays your body instead of the puck. Use changes of direction and pace to spoil his timing. When a man plays your body and lets the puck take care of itself, stickhandling tricks won't be very useful, so develop fakes, a pivot and a zig-zag, stops and starts, and outskate him. Don't get in too close.

3. Stickhandling is more effective against men who play the puck. Invite a check, then "deke" or fool him.

4. Learn on which side your checker is strongest. Chances are if he has a good poke or hook check on his left, he'll be eager to use it. Fake to his strong side, and then go to his weakness.

5. If a defenseman backs up in front of you, slow down and let him back up. If he is close to the goal, try to back him in as far as you can and fire a screen shot. Otherwise, try to force your man to make his play first, then break fast.

6. If the checker goes with you, throw him off with changes of pace and stops and starts. If you have a speed edge, slow down, then break fast and keep going.

7. Use your body when the checker comes at you from the side. Keep it between him and the puck, and carry your stick wide in the hand farthest from him.

8. Play the weak checker. If you are coming in on the defense, it's common sense to head for the man you know you have the best chance of beating.

9. If your tricks aren't working, try to figure out why. Develop an analytical attitude. Are you getting in a groove and doing the same thing every time? Are you moving too soon? Too late?

10. If the other team sticks a shadow on you, a checker who's always on your tail, use changes of pace and keep him unsettled. It helps to have an edge in condition, because then you can outwork him. However, if he's in better shape, don't waste breath trying to skate away from him. Wait for the opportunities and then try to get away with sudden bursts. Experiment until you find how you can shake your shadow. If you are heavier, you can often use your weight to advantage.

11. These hints won't be of much help unless you know when to use them. When you are on the bench, learn to analyze the opposing players. Watch how they play, how they skate, what their favourite checking tactics are. Hockey takes brains, too, and by using yours you will be able to avoid the all too common habits of skating to your checker's strong side, or trying to outskate a man who is faster.

Hockey is covered from A to Z in the new *Hockey Handbook*, by Lloyd Percival, just off the press. It de-

Coffee Cup Canine

Tinkle, a six-week-old Mexican Chihuahua weighing 12 ounces, peers from her hiding place in a coffee cup in her home at McCook, Nebraska. The dog is fed from an eye-dropper and travels in her owner's purse when accompanying her mistress on shopping trips.

scribes all the fundamentals from puck-carrying to shooting, scoring goals, planning offensive and defensive strategy, goalkeeping and passing. You can purchase a copy of *The Handbook* by sending \$3.50 plus 10c for mailing to Sports College.

Membership in Sports College is free. Merely write to "Sports College, Box 99, Toronto 1, Ontario," and you will be sent an application card. Services to members include a literature service of more than 100 publications covering all sports. Mention the newspaper in which you saw this column when you apply for membership.

The regular Sports College radio broadcast carries additional coaching and advice from famous athletes every Saturday afternoon. Look up the time and station in your area, and become a regular listener.

LARGE METEORITE

A meteorite weighing 40,000 tons crashed into a Siberian forest in 1908. The air waves it stirred up reached as far as Washington, D.C.

World Happenings Briefly Told

Canada is in great need of farm labor but hopes to receive 5,000 workers this year through the International Refugee Organization.

Britain's Prime Minister Clement Attlee told Parliament that 12,614 men, women and children emigrated by sea to Canada and 50,519 to Australia during 1950.

Yugoslavia, hard-hit by drouth, won a unanimous \$480,000 grant from the United Nations international children's emergency fund to help hungry children and mothers.

Dr. Werner Dankwort, first German diplomatic representative to come to Canada in more than 10 years, has arrived in Ottawa to take up his post as consul-general.

British engineers have built and tested the world's first gas-turbine engine to drive an ocean-going ship. It was built in Rugby, England, by the makers of the first jet engine.

The biggest tea installation in the world started operating at a Johannesburg gold mine recently. It consists of six giant "teapots" which supply 1,250 gallons a day to 10,000 workers.

KITCHEN MEDITATIONS

By JANE DALE

HOW MUCH?

How much does a small child cost? Have you ever stopped to add it up in a column fair and true? Can you tell me now in black and white, or in so many dollar bills what your child means to you?

How much does a small child cost? I see you cannot add it up for it is far too hard to know. You don't know how much to put down for sleepless nights, and all the steps you go; for all the work a small child makes; all the worry and care; and the loss of freedom too.

You can't add it up in silver coins, or the largest dollar bills in a column fair and true. Just one smile on a baby's face or a word from tiny lips will pay the largest bill; just the feel of an eager pair of arms, or whispered words, "I love you mum!" leaves you a debtor still!

Weekly Tip

PIPE CAMOUFLAGE

When redecorating a room, paint pipes and radiators to match the walls and thus render them inconspicuous. The lighter the tints used, the more heat given off, experts will tell you. Flat paint is the best type of coating to use.

—By Al Vermeer

Believed Extinct Bird Found On Bermuda Isles

HAMILTON, Bermuda.—The Bermuda Cahow, a bird thought to have been extinct for centuries, has been found nesting in some of the colony's islets by Dr. Robert Cushman Murphy, curator of birds at the American Museum of Natural History, New York.

Expeditions organized by Dr. Murphy in association with Louis Mowbray, curator of the Bermuda government aquarium, led to the finding of cahow burrows. Ten birds were seen on one of the islands. In all 14 burrows occupied by cahows were discovered. Three birds were actually handled and photographed.

Dr. Murphy said he had long been

familiar with the history of the Bermuda cahow, thought to have been extinct since the 17th century.

In some mysterious fashion, the cahow finds its way back to its burrows in Bermuda after scouring hundreds of miles of ocean which has the same temperature, same salinity and is covered by winds "running all around the compass."

Dr. Murphy described the cahow as a charming, small grey and white bird with bright pink feet. Across its forehead is a white band while its beak is black.

The Bermuda Cahow is a winter-nesting petrel, the only one in the northern hemisphere, although there are many types in the southern hemisphere.

The bird once flourished on the islands of Bermuda and is reputed to have saved the early settlers from starvation. Historians tell how the colonists used the cahows for food and found them "fat and full as a partridge."

ODDITIES IN THE NEWS

A Rhode Island red hen owned by Miss E. Jones, of Bodorgan, Wales, laid an egg weighing 6½ ounces. Normal weight is three ounces.

Fifty thousand spectators and uncounted thousands of television viewers gasped while watching an international rugby match between England and France. An English player lost his pants in a scrimmage. Abandoning the game temporarily, players of both teams crowded in a huddle around their embarrassed mate. When the huddle broke up the pants had been replaced.

A Bremerhaven, Germany, girl has solved the mystery of the runs in her stocking. They always appeared in the stocking on her right leg. She also felt pains. Recently a doctor removed from her leg a needle which had inched through her body for years since she swallowed it as a child.

Patterns

Two For Parties

7190

Alice Brooks

Be the prettiest hostess they ever saw! Embroidered jonquils and contrasting tulips decorate two party aprons. Both easy!

LESS than a yard for each apron! Pattern 7190; transfer, cutting charts.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

It's the best ever—our latest Alice Brooks Needlework catalogue! Send twenty-five cents in coins for your copy. Illustrations of designs for crocheting, knitting, embroidery, toys, quilts, children's clothes. Free needlework pattern is printed in book.

FOR CHARITY

NIAGARA FALLS, Ont.—A local hotel discovered an oversight and mailed a cheque for \$1.10 to a New Jersey doctor who had not been given a premium on his United States currency. Back came the cheque with an additional \$3.90, a total of \$5 for charity.

Manitoba T.B. Death Rate Lowest In History

WINNIPEG.—Dr. E. L. Ross, medical director for the sanatorium board of Manitoba said in his annual report that Manitoba's tuberculosis death rate in 1950 was "the lowest ever recorded".

Dr. Ross said the death rate had dropped to 183, or 23.9 per 100,000 population during the year. This is a 50-per cent. reduction over the last 10 years.

The medical director said the prevalence of the disease among white people and Indians in the province showed a "decided decrease". In 23 municipalities no new cases had been found or reported in the last two years.

However, he said analysis of new cases showed increasing incidence of TB in the older age groups and among young children. In both groups the 1950 figure was almost double that of 1942.

Dr. Ross said this emphasized the importance of routine x-ray inspections for older people, often thought immune.

The central tuberculosis registry showed a record of 5,082 patients for Manitoba. Of these 4,023 were white people, 1,046 Indians and 23 Eskimos. The majority of these were well and at home, Dr. Ross said.

Helpful Hints

You can save time and steps if you keep a special dustcloth concealed somewhere in the livingroom for emergency use. Launder it often in hot soapsuds, or it may spread more dust than it picks up.

A clean stove is just as important in preparing food as a clean cooking utensil. Frequent care makes the job easy. Don't give grease and splattered foods time to harden and accumulate. Keep the oven clean by wiping the walls with a soapy, damp cloth after removing shelves and heating elements. Then swab down with a dry cloth. Wash the broiler pan as if it were a dish, after using.

Parchment and parchment-like paper lamp shades can be washed. Use thick, warm suds and work quickly. Pick up some "dry" top suds with a damp (not dripping wet) sponge and wash the shade's outer surface. Wipe the suds off with a clean, damp sponge and dry the surface with a soft cloth. Remember, a clean lampshade lets through more light.

Two Sets Of Twin Calves Born On Manitoba Farm

BRANDON. —The cattle herd of Alf. Poole, who farms six miles west of Brandon, was substantially increased when two cows both gave birth to twins. They were the first multiple births to occur on Mr. Poole's farm and all concerned are reported to be in good health.

The four calves were sired by a pure-bred Hereford bull and out of grade cows.

The man's name, Sebastian, means "venerable". 2923

MODEL IS THE WORD—A perfect model for feminine pulchritude is displayed herewith by Miss Mari Blanchard, one of Paramount's newest and shapeliest starlets. One look shows that Mari has what every woman wants (to say nothing of males) and it's no surprise to know she was a famous model before Paramount signed her.

B.C. To Plant 7,500,000 Fir Trees

VICTORIA, B.C.—British Columbia's annual reforestation program, aiming to keep the province's \$400,000,000-a-year lumber industry going, will start soon.

Harold McWilliams, head of the reforestation division of the provincial forest service, said about 7,500,000 fir seedlings will be put in the ground during the two-month planting season.

This will bring the total planted since 1930 to 82,000,000 trees on almost 100,000 acres of burned-over and logged-out areas. Of this total, private companies have planted about 15 per cent.

The two-year-old seedlings now are being lifted at the three forest nurseries. About 350 men will set out the trees on 10,000 acres of cut-over timberland on Vancouver island. Wages will be around \$1.02 an hour.

The reforestation division gathered 4,900 bushels of Douglas fir cones in 1950; which produced 2,500 pounds of seed with a market value of \$7 a pound.

Confidence Not Misplaced

In Keokuk, Iowa, bankers have found that their confidence in their fellow men was not misplaced. When the city installed parking meters recently, one bank filled a large fishbowl with pennies and nickels and invited its customers to make their own change. Other banks followed suit. The bankers reported afterward there were no shortages in their fishbowl funds. One bank, in fact, was a nickel ahead—Sault Daily Star.

These Hens Lay Closest Thing To Golden Eggs

IROQUOIS.—Major D. L. Fenton, River Road West, has the closest thing to hens that lay golden eggs—two Aracana birds of South American lineage.

Their eggs—not golden but blue-green in color—bring up to \$24 a dozen on the Toronto market. But there's a catch to hopes of quick wealth; for the hens only lay about four eggs in a week's time.

Major Fenton purchased the two light buff to reddish brown hens and a reddish black rooster from Dr. Pember MacIntosh of Spencerville, who imported them from South America. Dr. MacIntosh has bred and sold the birds throughout Ontario.

Slightly smaller than the common species of hen, these fowl come in all colors of the rainbow. The eggs average the same size of Leghorn or Barred Rock eggs.

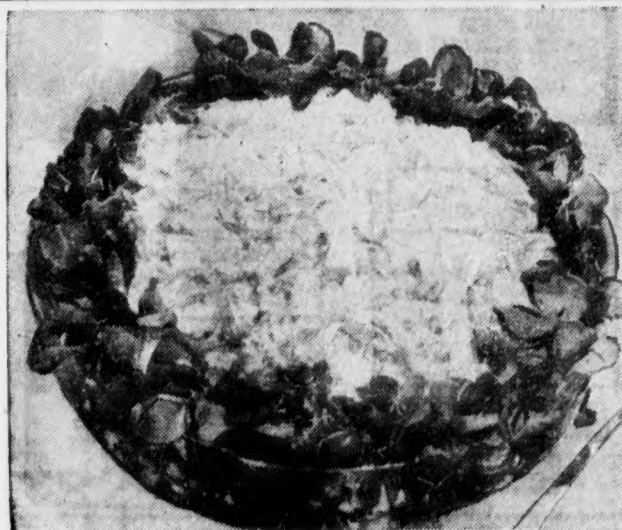

A pair of Aracanas may come as high as \$150.

HORSE STILL IMPORTANT

HALIFAX, N.S.—Shipment of 350 horses from Nova Scotia to Corner Brook, Nfld., to help haul the record cut from Bowater's woods camps to the company's world's largest pulp and paper mills proves that tractors haven't completely ousted Dobbin yet.

Gotland or Gotland is the largest island in the Baltic sea. It is situated about 44 miles from Sweden.

: Selected Recipes :

Something new in a salad—leftover chicken combined with fruits! The family will ask for an encore.

CHICKEN has long been a treat to be enjoyed by the family and guests alike, for who doesn't like a tender, juicy, crispy coated wing or drumstick? If you plan to have chicken for a dinner party, cook enough to be used in a second day dish, that will be as tempting as the party fare itself. Use the leftovers in a soufflé, a salad, a meat loaf or on toast. Any way you serve it, it's still good!

And when you are cooking that chicken, remember that slow cooking is best. High temperatures tend to make the meat dry and stringy.

Westchester Chicken Salad

Three cups diced, cooked chicken, 1 cup diced, unpared red apples, 1 cup pineapple cubes, drained, if desired, 1 cup diced grapefruit sections, drained, mayonnaise, water.

Combine chicken with apples, well-drained pineapple and grapefruit sections. Mix well. Add enough mayonnaise to hold ingredients together. Serve on water cream with additional mayonnaise if desired. Yield: 8 servings.

Garden Notes

Hardier, Earlier And Better

To anyone who hasn't looked at a seed catalogue for several years there will be a lot of things there today that are completely new. There are tenderer and larger beans, sweeter corn, new and much better varieties in almost every line. As well, there has been steady improvement, particularly in hardiness.

It is not so many years since corn was practically unknown in Prairie gardens. In fact it was only introduced into Southern Ontario about the beginning of the century. Today one can grow garden corn successfully away north. The reason? Earlier maturing varieties.

And what has been done in corn has also been done in melons, cucumbers, beans, peas, tomatoes and all sorts of other things. By getting varieties that mature faster, the plant breeder has overcome our Canadian handicap of late and early frosts. In the modern seed catalogue there is usually listed the number of days it takes to grow individual varieties. This is vital information for the gardener who lives outside those very limited areas where the first of May means that danger from frosts is practically over.

For Better Soil

Even the most unpromising soil has garden possibilities. Look at what some city gardeners have done with the assorted blue clay, mortar and broken bricks builders have used for grading up the backyard. Almost anything will break down in time and what won't can be hauled away or used for drainage. With very heavy soil, lying fairly level, some drainage is needed. With large plots this can be done by installing tile drains although an open ditch will be a lot cheaper and may do well enough. Also it is a good plan where the plot is small to add sand or ashes.

After this, treatment for very heavy or very light soil is about the same. The main thing is to get in plenty of humus and cultivate. Humus is simply a high class name for ordinary manure—grass cuttings, straw or even just green weeds and other plants. The more of this stuff that is dug in the more open and porous the soil becomes. Where possible, it's a good plan to grow a crop of clover, Fall rye, oats or some rank-growing thing, and dig or plow this under. After a few years' treatment even the toughest or most barren soil becomes mellow and, as the experts say, friable.

GEMS OF THOUGHT

PREPARATION

Promise yourself . . . to give so much time to the improvement of yourself that you have no time to criticize others.—Christian D. Larson.

What stubbing, plowing, digging, and harrowing is to the land, that thinking, reflecting, examining is to the mind.—George Berkeley.

Get away from the crowd when you can. Keep yourself to yourself, if only for a few hours daily.

—Arthur Brisbane.

One's first lesson is to learn one's self; having done this, one will naturally, through grace from God, forgive his brother and love his enemies. —Mary Baker Eddy.

It is impossible you should take true root but by the fair weather that you make yourself; it is needful that you frame the season for your own harvest.—Shakespeare.

Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth.—II Timothy 2:15.

SMILE OF THE WEEK

HE LAUGHED

The boy's mother found him bawling in the basement.

"Willy darling, what's the matter?"

"The hammer fell on Daddy's foot," sobbed Willie.

"Why, honey, that's nothing to cry about."

"I didn't cry," whimpered Willy, "I laughed."

MAY GET AIR INSURANCE THROUGH SLOT MACHINES

WINNIPEG.—Air travellers from Manitoba will be able to take out insurance policies by slot machine.

The Manitoba legislature gave second reading to a bill approving the principle of automatic vending machines for accident insurance in air travel.

Manitoba is the first province to introduce such legislation. Rates will start from 25 cents.

There are more than 400 different types of cheese.

The regular meeting of the Carbon Lions Club will be held Wednesday, March 28, at 7:30 p.m.

Born in Three Hills hospital to Mr. and Mrs. Buddy Anderson on Wednesday, March 14, a daughter

Mr. and Mrs. C. C. Diede were Calgary visitors Thursday of last week, where Mr. Diede attended a Massey Harris dealers meeting. A tea for the dealers wives was held at Picardy's in the afternoon and in the evening dealers and wives were guests of the company at a banquet held at the Al San club. Because of the blizzard Mr. and Mrs. Diede could not return home until Sunday.

DO YOU KNOW that canvassers for the Red Cross give their time and efforts and out of pocket expenses free gratis? You can help them by bringing your donation to the post office, Village office, Bank of Montreal or Chronicle office, where official Red Cross receipts will be issued. Donations are deductible from income. The Carbon branch quota is \$950. Do it now! The need is urgent.

The Home and School Association tea and sale of home cooking planned for March 17, was cancelled because of the blizzard. A new date will be set at the H. S. A. meeting on April 10.

Chris Thumert, Johnny Diede, Theo Harsch and Roman Ohlhauer took part in the Lions Club bonspiel held in Calgary last Wednesday. The foursome won one game and lost two. The only prize winner was Roman, whose display of the fine art of curling won him third prize for missing the broom most.

Don Pattison of Lacombe is holidaying in Carbon at the home of his father.

Mind Your Manners

Good manners behind the wheel is smart and safer too. Show other drivers that you respect their privileges and you'll find they'll do the same for you. Besides, good manners go hand in hand with good driving. Try being courteous—IT PAYS.
